FIG. 82 is a flowchart illustrating a process for displaying and updating user preferences. The process begins at a Start node, leading to a Request Profile step. This step leads to a User Profile data store. From the User Profile, the process proceeds to a decision diamond: What Attributes Can User Access?. If the answer is Yes, the process moves to a Display Preferences Available For Edit step. If the answer is No, the process moves to an Update Another decision diamond. The Update Another diamond has a Yes path that loops back to the User Profile and a No path that leads to an End node. From the Display Preferences Available For Edit step, the process moves to a Display Preference Options step. From this step, the user can either select a preference (Select Preference) or cancel (User Selects Cancel). The Select Preference path leads to an Application Changes Preference step, which then leads back to the User Profile. The User Selects Cancel path leads back to the Display Preferences Available For Edit step.
